**6A High-Speed MOSFET Drivers**

**Features**
- Latch-Up Protected: Will Withstand >1.5A Reverse Output Current
- Logic Input Will Withstand Negative Swing Up To 5V
- ESD Protected: 4 kV
- Matched Rise and Fall Times:
  - 25 ns (2500 pF load)
- High Peak Output Current: 6A
- Wide Input Supply Voltage Operating Range:
  - 4.5V to 18V
- High Capacitive Load Drive Capability: 10,000 pF
- Short Delay Time: 55 ns (typ.)
- CMOS/TTL Compatible Input
- Low Supply Current With Logic ‘1’ Input:
  - 450 µA (typ.)
- Low Output Impedance: 2.5Ω
- Output Voltage Swing to Within 25 mV of Ground or VDD
- Space-Saving 8-Pin SOIC and 8-Pin 6x5 DFN Packages

**Applications**
- Switch-Mode Power Supplies
- Motor Controls
- Pulse Transformer Driver
- Class D Switching Amplifiers

**General Description**

The TC4420/TC4429 are 6A (peak), single-output MOSFET drivers. The TC4429 is an inverting driver (pin-compatible with the TC429), while the TC4420 is a non-inverting driver. These drivers are fabricated in CMOS for lower power and more efficient operation versus bipolar drivers.

Both devices have TTL/CMOS compatible inputs that can be driven as high as VDD + 0.3V or as low as –5V without upset or damage to the device. This eliminates the need for external level-shifting circuitry and its associated cost and size. The output swing is rail-to-rail, ensuring better drive voltage margin, especially during power-up/power-down sequencing. Propagational delay time is only 55 ns (typ.) and the output rise and fall times are only 25 ns (typ.) into 2500 pF across the usable power supply range.

Unlike other drivers, the TC4420/TC4429 are virtually latch-up proof. They replace three or more discrete components, saving PCB area, parts and improving overall system reliability.

**Package Types**

Supply Voltage ..................................................... +20V
Input Voltage .................................. – 5V to VDD + 0.3V
Input Current (VIN > VDD)............................... 50 mA
Power Dissipation (TA ≤ 70°C)
  5-Pin TO-220 .................................................... 1.6W
  CERDIP ....................................................... 800 mW
  DFN ........................................................... Note 2
  PDIP ........................................................ 730 mW
  SOIC ......................................................... 470 mW

Package Power Dissipation (TA ≤ 25°C)
  5-Pin TO-220 (With Heatsink) ....................... 12.5W

Thermal Impedances (To Case)
  5-Pin TO-220 RθJC ...................................... 10°C/W

† Stresses above those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions above those indicated in the operation sections of the specifications is not implied. Exposure to Absolute Maximum Rating conditions for extended periods may affect device reliability.

DC CHARACTERISTICS

Electrical Specifications: Unless otherwise noted, TA = +25°C with 4.5V ≤ VDD ≤ 18V.

2.0 TYPICAL PERFORMANCE CURVES

Note: The graphs and tables provided following this note are a statistical summary based on a limited number of samples and are provided for informational purposes only. The performance characteristics listed herein are not tested or guaranteed. In some graphs or tables, the data presented may be outside the specified operating range (e.g., outside specified power supply range) and therefore outside the warranted range.

Note: Unless otherwise indicated, $T_A = +25^\circ C$ with $4.5V \leq V_{DD} \leq 18V$.

FIGURE 2-1: Rise Time vs. Supply Voltage.

FIGURE 2-2: Rise Time vs. Capacitive Load.

#### 3.1 Supply Input (V_DD)

The V_DD input is the bias supply for the MOSFET driver and is rated for 4.5V to 18V with respect to the ground pins. The V_DD input should be bypassed to ground with a local ceramic capacitor. The value of the capacitor should be chosen based on the capacitive load that is being driven. A minimum value of 1.0 μF is suggested.

#### 3.2 Control Input

The MOSFET driver input is a high-impedance, TTL/CMOS compatible input. The input circuitry of the TC4420/TC4429 MOSFET driver also has a “speed-up” capacitor. This helps to decrease the propagation delay times of the driver. Because of this, input signals with slow rising or falling edges should not be used, as this can result in double-pulsing of the MOSFET driver output.

#### 3.3 CMOS Push-Pull Output

The MOSFET driver output is a low-impedance, CMOS, push-pull style output capable of driving a capacitive load with 6.0A peak currents. The MOSFET driver output is capable of withstanding 1.5A peak reverse currents of either polarity.

#### 3.4 Ground

The ground pins are the return path for the bias current and the high peak currents that discharge the load capacitor. The ground pins should be tied into a ground plane or have very short traces to the bias supply source return.

#### 3.5 Exposed Metal Pad

The exposed metal pad of the 6x5 DFN package is not internally connected to any potential. Therefore, this pad can be connected to a ground plane or other copper plane on a printed circuit board (PCB) to aid in heat removal from the package.
4.0 APPLICATIONS INFORMATION

**FIGURE 4-1:** Switching Time Test Circuits.

Note: Pinout shown is for the PDIP, SOIC, DFN and CERDIP packages.
5.0 PACKAGING INFORMATION

5.1 Package Marking Information

Legend:

XX...X  Customer-specific information
Y       Year code (last digit of calendar year)
YY      Year code (last 2 digits of calendar year)
WWW     Week code (week of January 1 is week ‘01’)
NNN     Alphanumeric traceability code
\textsuperscript{e3}  Pb-free JEDEC designator for Matte Tin (Sn)
*       This package is Pb-free. The Pb-free JEDEC designator (\textsuperscript{e3})
         can be found on the outer packaging for this package.

Note: In the event the full Microchip part number cannot be marked on one line, it will
be carried over to the next line, thus limiting the number of available
characters for customer-specific information.

Device: TC4420: 6A High-Speed MOSFET Driver, Non-Inverting
TC4429: 6A High-Speed MOSFET Driver, Inverting

Temperature Range: C = 0°C to +70°C (PDIP, SOIC, and TO-220 Only)
I = -25°C to +85°C (CERDIP Only)
E = -40°C to +85°C
V = -40°C to +125°C

Package: AT = TO-220, 5-lead (C-Temp Only)
JA = Ceramic Dual In-line (300 mil Body), 8-lead (I-Temp Only)
MF = Dual, Flat, No-Lead (6X5 mm Body), 8-lead
MF713 = Dual, Flat, No-Lead (6X5 mm Body), 8-lead (Tape and Reel)
PA = Plastic DIP (300 mil Body), 8-lead
OA = Plastic SOIC, (150 mil Body), 8-lead
OA713 = Plastic SOIC, (150 mil Body), 8-lead (Tape and Reel)

PB Free
G = Lead-Free device*
    = Blank

* Available on selected packages. Contact your local sales representative for availability

Examples:

a) TC4420CAT: 6A High-Speed MOSFET Driver, Non-inverting, TO-220 package, 0°C to +70°C.
b) TC4420EAOA: 6A High-Speed MOSFET Driver, Non-inverting, SOIC package, -40°C to +85°C.
c) TC4420VMF: 6A High-Speed MOSFET Driver, Non-inverting, DFN package, -40°C to +125°C.

a) TC4429CAT: 6A High-Speed MOSFET Driver, Inverting, TO-220 package, 0°C to +70°C.
b) TC4429EPA: 6A High-Speed MOSFET Driver, Inverting, PDIP package, -40°C to +85°C.
c) TC4429VMF: 6A High-Speed MOSFET Driver, Inverting, DFN package, -40°C to +125°C.

Sales and Support

Data Sheets
Products supported by a preliminary Data Sheet may have an errata sheet describing minor operational differences and recommended workarounds. To determine if an errata sheet exists for a particular device, please contact one of the following:

1. Your local Microchip sales office
2. The Microchip Worldwide Site (www.microchip.com)

Please specify which device, revision of silicon and Data Sheet (include Literature #) you are using.

Customer Notification System
Register on our web site (www.microchip.com.cn) to receive the most current information on our products.
Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Information contained in this publication regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. MICROCHIP MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION, INCLUDING BUT NOT LIMITED TO ITS CONDITION, QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR PURPOSE. Microchip disclaims all liability arising from this information and its use. Use of Microchip devices in life support and/or safety applications is entirely at the buyer's risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights.

Trademarks

The Microchip name and logo, the Microchip logo, dsPIC, FlashFlex, Keeloq, Keeloq logo, MPLAB, PIC, PICmicro, PICSTART, PIC18, PIC logo, rPIC, SST, SST Logo, SuperFlash and UNI/O are registered trademarks of Microchip Technology Incorporated in the U.S.A. and other countries.

FilterLab, Hampshire, Hi-TECH C, Linear Active Thermistor, MTP, SEEVAL and The Embedded Control Solutions Company are registered trademarks of Microchip Technology Incorporated in the U.S.A.

Silicon Storage Technology is a registered trademark of Microchip Technology Inc. in other countries.

Analog-for-the-Digital Age, Application Maestro, BodyCom, chipKIT, chipKIT logo, CodeGuard, dsPICDEM, dsPICDEM.net, dsPICWorks, dsSPEAK, ECAN, ECONOMONITOR, FanSense, HI-TIDE, In-Circuit Serial Programming, ICSP, Mindi, MiWi, MPASM, MPF, MPLAB Certified logo, MPLIB, MPLINK, mTouch, Omniscient Code Generation, PICC, PICC-18, PICDEM, PICDEM.net, PICKit, PICtail, REAL ICE, rFLAB, Select Mode, SQI, Serial Quad I/O, Total Endurance, TSHARC, UniWinDriver, WiperLock, ZENA and Z-Scale are trademarks of Microchip Technology Incorporated in the U.S.A. and other countries.

SQTP is a service mark of Microchip Technology Incorporated in the U.S.A.

GestIC and ULPP are registered trademarks of Microchip Technology Germany II GmbH & Co. & KG, a subsidiary of Microchip Technology Inc., in other countries.

All other trademarks mentioned herein are property of their respective companies.

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company’s quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, Keeloq® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip’s quality system for the design and manufacture of development systems is ISO 9001:2000 certified.
