Features

- Wide Frequency Range: 2 kHz to 80 MHz
- Ultra-Low Power Consumption: 1.3 mA/12 µA (Active/Standby)
- Ultra-Small Footprints
  - 1.6 mm × 1.2 mm
  - 2.0 mm × 1.6 mm
  - 2.5 mm × 2.0 mm
  - 3.2 mm × 2.5 mm
- Frequency Select Input Supports Two Pre-Defined Frequencies
- High Stability: ±25 ppm, ±50 ppm
- Wide Temperature Range
  - Industrial: –40°C to 85°C
  - Ext. Commercial: –20° to 70°C
- Excellent Shock and Vibration Immunity
  - Qualified to MIL-STD-883
- High Reliability
  - 20x Better MTF Than Quartz Oscillators
- Supply Range of 1.71V to 3.63V
- Short Sample Lead Time: <2 weeks
- Lead Free & RoHS Compliant

Applications

- Low Power/Portable Applications: IoT, Embedded/Smart Devices
- Consumer: Home Healthcare, Fitness Devices, Home Automation
- Automotive: Rear View/Surround View Cameras, Infotainment System
- Industrial: Building/Factory Automation, Surveillance Camera

General Description

The DSC60xx family of MEMS oscillators combines industry-leading low-power consumption, ultra-small packages with exceptional frequency stability, and jitter performance over temperature. The single-output DSC60xx MEMS oscillators are excellent choices for use as clock references in small, battery-powered devices such as wearable and Internet of Things (IoT) devices in which small size, low power consumption, and long-term reliability are paramount. They also meet the stringent mechanical durability and reliability requirements within Automotive Electronics Council standard Q100 (AEC-Q100), so they are well suited for under-hood applications as well.

The DSC60xx family is available in ultra-small 1.6 mm x 1.2 mm and 2.0 mm x 1.6 mm packages. Other package sizes include: 2.5 mm x 2.0 mm and 3.2 mm x 2.5 mm. These packages are "drop-in" replacements for standard 4-pin CMOS quartz crystal oscillators.

Ultra-Small, Ultra-Low Power MEMS Oscillator
# 1.0 ELECTRICAL CHARACTERISTICS

## Absolute Maximum Ratings

Supply Voltage: –0.3V to +4.0V  
Input Voltage (Vin): –0.3V to VDD+0.3V  
ESD Protection: 4 kV HBM, 400V MM, 2 kV CDM

### ELECTRICAL CHARACTERISTICS

**Electrical Characteristics:** Unless otherwise indicated, VDD = 1.8V –5% to 3.3V +10%, TA = –40°C to 85°C.

*Note 1:* Pin 4 VDD should be filtered with 0.1 µF capacitor.  
*Note 2:* Not including current through pull-up resistor on EN pin (if configured). Higher standby current seen at >3.3V VDD.  
*Note 3:* Includes frequency variations due to initial tolerance, temp. and power supply voltage.  
*Note 4:* Input waveform must be monotonic with rise/fall time < 10 ms  
*Note 5:* Output Disable time takes up to one period of the output waveform + 200 ns.  
*Note 6:* For parts configured with OE, not Standby.  
*Note 7:* Output is enabled if pad is floated or not connected.  
*Note 8:* Output Duty Cycle will be 40% to 60% when output frequency is between 40 MHz to 60 MHz.  
*Note 9:* Time to reach 90% of target VDD. Power ramp rise must be monotonic.

<tr>
<td>Soldering Temperature</td>
<td>$T_S$</td>
<td>—</td>
<td>+260</td>
<td>—</td>
<td>°C</td>
<td>40 sec. max.</td>
</tr>
</tbody>
</table>

**Note 1:** The maximum allowable power dissipation is a function of ambient temperature, the maximum allowable junction temperature and the thermal resistance from junction to air (i.e., $T_A$, $T_J$, $\theta_{JA}$). Exceeding the maximum allowable power dissipation will cause the device operating junction temperature to exceed the maximum +150°C rating. Sustained junction temperatures above +150°C can impact the device reliability.
2.0 PIN DESCRIPTIONS

The descriptions of the pins are listed in Table 2-1 and Table 2-2.

TABLE 2-1: DSC6001/03/11/13/21/23/41/43/51/53/61/63 PIN FUNCTION TABLE (OUTPUT ≥1 MHZ)

2.1 Output Buffer Options

The DSC60xx family is available in multiple output driver configurations.

The low-drive DSC60x3 is configured with a low-power driver that minimizes current consumption and EMI while delivering greater than 1 mA output current at 20%/80% of the supply voltage. The standard-drive DSC60x1 delivers greater than 3 mA output current at 20%/80% of the supply voltage.

APPENDIX A: REVISION HISTORY

Revision A (September 2016)
• Initial creation of DSC60xx Microchip data sheet DS20005625A.

Revision B (September 2017)
• Added Power Supply Ramp value in Electrical Characteristics table.
• Redrew diagrams for clarity. No technical content affected.

Revision C (November 2018)
• Added a new condition to the Active Supply Current parameter with a new typical value in the Electrical Characteristics table.
## PRODUCT IDENTIFICATION SYSTEM

To order or obtain information, e.g., on pricing or delivery, contact your local Microchip representative or sales office.

**Pin Definition:**
- Selection Pin 1 Internal Pull-Up Register
- 0: OE Pull-up
- 1: STDBY Pull-up
- 2: FS Pull-up
- 4: OE None
- 5: STDBY None
- 6: FS None
- 8: kHz None

**Output Drive Strength:**
- 1: Standard
- 3: Low

**Packages:**
- C = 4-Lead 3.2 mm x 2.5 mm DFN
- J = 4-Lead 2.5 mm x 2.0 mm VLGA
- M = 4-Lead 2.0 mm x 1.6 mm VFLGA
- H = 4-Lead 1.6 mm x 1.2 mm VFLGA

**Temperature Range:**
- E = –20°C to +70°C (Extended Commercial)
- I = –40°C to +85°C (Industrial)

**Frequency Stability:**
- 1 = ± 50 ppm
- 2 = ± 25 ppm

**Revision:**
- A = Revision A

**Frequency:**
- xxx.xxx = User-Defined Frequency between 001.0000 MHz and 80.0000 MHz
- xxxxxx = User-Defined Frequency between 002.000 kHz and 999.999 kHz
- xxxx = Frequency configuration code when pin 1 = FS. Configure the part online through ClockWorks configurator.

**Tape and Reel:**
- <blank> = 100/Bag
- T = 1,000/Reel

**Examples:**

a) DSC6013JI2A-100.000:
Ultra–Low Power MEMS Oscillator, Pin1 = Standby with Internal Pull-Up, Low Drive Strength, 4-Lead 2.5 mm x 2.0 mm VLGA, Industrial Temperature, ±25 ppm Stability, Revision A, 100 MHz Frequency, 100/Bag

b) DSC6001HE1A-016.0000T:
Ultra–Low Power MEMS Oscillator, Pin1 = OE with Internal Pull–Up, Standard Drive Strength, 4-Lead 1.6 mm x 1.2 mm VFLGA, Extended Commercial Temp., ±50 ppm Stability, Revision A, 16 MHz Frequency, 1,000/Reel

c) DSC6021MI2A-005Q:
Ultra–Low Power MEMS Oscillator, Pin1 = Freq. Select with Internal Pull-Up, Standard Drive Strength, 4-Lead 2.0 mm x 1.6 mm VFLGA, Industrial Temperature, ±25 ppm Stability, Revision A, Two Frequencies Configured through ClockWorks, 100/Bag

**Note 1:** Tape and Reel identifier only appears in the catalog part number description. This identifier is used for ordering purposes and is not printed on the device package. Check with your Microchip Sales Office for package availability with the Tape and Reel option.

---

**Note 1:** Please visit Microchip ClockWorks® Configurator Website to configure the part number for customized frequency. http://clockworks.microchip.com/timing/.
Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip’s Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as “unbreakable.”

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip’s code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Information contained in this publication regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. MICROCHIP MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION, INCLUDING BUT NOT LIMITED TO ITS CONDITION, QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR PURPOSE. Microchip disclaims all liability arising from this information and its use. Use of Microchip devices in life support and/or safety applications is entirely at the buyer’s risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights unless otherwise stated.

Trademarks

The Microchip name and logo, the Microchip logo, AnyRate, AVR, AVR logo, AVR Freaks, BitCloud, chipKIT, chipKIT logo, CryptoMemory, CryptoRF, dsPIC, FlashFlex, flexPWR, Heldo, JukeBox, KeeLoq, Kleer, LANChek, LINK MD, maxXStylus, maxXTouch, MediaLB, megaAVR, MOST, MOST logo, MPLAB, OptoLyzer, PIC, picoPower, PICSTART, PIC32 logo, Prochip Designer, QTouch, SAM-BA, SpyNIC, SST, SST Logo, SuperFlash, tinyAVR, UNI/O, and XMEGA are registered trademarks of Microchip Technology Incorporated in the U.S.A. and other countries.

ClockWorks, The Embedded Control Solutions Company, EtherSynch, Hyper Speed Control, HyperLight Load, IntelliMOS, mTouch, Precision Edge, and Quiet-Wire are registered trademarks of Microchip Technology Incorporated in the U.S.A.

SQTP is a service mark of Microchip Technology Incorporated in the U.S.A.

Silicon Storage Technology is a registered trademark of Microchip Technology Inc. in other countries.

GestIC is a registered trademark of Microchip Technology Germany II GmbH & Co. KG, a subsidiary of Microchip Technology Inc., in other countries.

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company’s quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KeeLoq® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip’s quality system for the design and manufacture of development systems is ISO 9001:2000 certified.
